World Wellness Group

WORLD WELLNESS GROUP

World Wellness Group focuses on promoting health, wellness, equity, cultural diversity and traditional approaches to health and wellbeing. From healthcare and medicine to wellbeing and helpline services, WWG provides much needed assistance to a diverse range of people. The organisation aims to build health equity among communities, assisting marginalised and excluded peoples within these groups.

With such ambitious vision, it is critical that WWG is able to effectively manage thousands of different clients in need. Since using redCASE, this task has become far simpler.

OUR CONNECTION:

"World Wellness Group has been working with the Redbourne Team using redCASE for the past 3 years as a part of the PHN recommended client data system. Any new systems of client data can be challenging at times, and WWG found to have the support given to staff by the Redbourne operational members to be very useful, prompt, and valuable."

"The team is willing to accept feedback, improve systems in client data reporting according to our unique specifications and this is an ongoing development."

redCASE
